FAMILY DISCOVERY DAYS

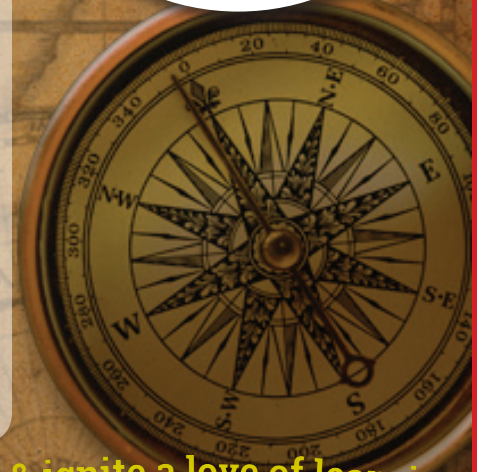

MAY 3, 2014

Build a Compass!

- ▶ We will be using everyday materials to create a compass and learn about the directions on a compass.
- ▶ **MAPPING** -- Learn the importance of maps of Northern Minnesota and learn how to draw and make a map legend so others can follow your directions from here to there on the Minnesota Discovery Center grounds.
- ▶ **GEOCACHING** -- Use your homemade compass and then enter the world of GPS devices. We will practice finding a cache on Minnesota Discovery Center grounds and then hide a cache for someone else to find.
- ▶ **WORM JAR** -- We see worms when it rains or when we go fishing. Now you will get to build a habitat for a worm to take home and see what they do below ground.

ADDITIONAL PROGRAM FOR TEENS!

TEEN TINKER LAB -- Build "the most useless machine ever." Regular admission plus \$10 materials fee per kit. Teen Tinker Lab space is limited for ages 10 and up and parents, call 218-254-7959 to register.

Inspire, create & ignite a love of learning.

General admission, Free for MDC Members
